Why Do You Want to Work?

TKM Internship Programme • 2026

01

Imagine you get ₹2–5 Lakhs every month.
For the rest of your life.
For free. No work. No conditions.

Would you trade your passion, your dreams, your career for it?

The Honest Answer

What people say:

Passion

Dream

Impact

Purpose

What's actually true:

Making money.

And that's completely fine.

Money is not a dirty word.

What Do You Do With the Money?

- › Buy a car. Own a house.
- › Travel. Support your family.
- › Donate. Save. Invest.
- › Build a life that feels like yours.

Money = freedom to live on your own terms.

Then Why Do We Still Complain?

Bad road? → Buy a good car.

Bad hospital? → Go to the best private one.

Bad water? → Buy quality water.

Bad air? → Air purifier at home.

If money solves your problems — why are you still disturbing everyone around you?

There's a perception problem about India in the global tech world.

The reason is not the country.

The reason is us.

How Workplaces Become Toxic

- › Best friends in college → separated when jobs come up.
- › Back-pitching a colleague to get a better appraisal.
- › Hiring a friend instead of the stronger candidate.
- › Hoarding knowledge so no one else can grow.

No company wants this. People create it — for tiny personal gains.

The Compound Effect of Ethics

One honest person

- A better team
- A better product
- A better company
- A better India

What We're Building at TKM

Your role

Contribute honestly. Share what you know. Help your teammates grow.

Group role

Build real things together. You win together or you don't.

TKM's role

Produce engineers who are ethical AND skilled. Not just certificate-holders.

The Simple Rules

X Don't

- Hire someone for your own benefit
- Hoard knowledge or documents
- Let politics drive your decisions
- Misuse your position or access
- Create digital slavery

✓ Do

- Be honest. Always.
- Share what you know freely
- Help others grow — genuinely
- Influence people the right way
- The compound effect is real

Pay It Forward

Level 1 — Manu Sir (helped me, no reason, no conditions)

Level 2 — Me (here, helping you)

Level 3 — You (once you're ready, find your person)

Level 4 — The people you help

Reality Checks You Will Hit

Your English is fine — but you won't get their references. Their humour. Their small talk.

Your manager, colleague, or closest friend can shake your confidence in 5 minutes.

Someone you barely know will help you. Someone you trusted won't.

Known people sometimes help — but often with strings attached.

About Indian Managers

Based on real experience — Indian managers can be harder to grow under.

Not because they're bad people. But because many of them inherited exactly the culture we've been talking about today.

You will navigate this. Knowing it exists is half the battle.

“

I'm an unknown person to you today.

I'm here to help.

No conditions. No strings.

You can take it or leave it.

Nobody tells you this before your first job:

Coding is the easiest part.

You will learn to code. That's a given.

What's actually hard: navigating people, staying ethical under pressure, handling responsibility before you feel ready for it.

A Word Specifically for TKM Students

Most of the managers we described today came from colleges like TKM.

Big college → Big position early → Responsibility before the mindset catches up.

**You will be given power early.
Think twice before you use it.**

Be honest and follow ethics in whatever you do.

*You're not just building a career.
You're building India's reputation —
one decision at a time.*
